The Reactive Sleep System

3" Visco 8" 5" high density Foam

This is the 2nd in a collection of uncompromisingly Designed Sleep Systems. Experience this Internationally Inspired Collection.

Swedish "Body Sculpting Viscolastic Foam" combines with Body Lux HD Green Polyurethane Foam that is permanently bonded to give you an Orthopedic Core Foam, creating our Strada Sleep 8" thick Mattress. This proprietary design is unavailable through other manufactures. The use of these two bonded foams creates a highly reactive Sleep System, neither too firm nor too soft. A truly Unique Sleeping Experience. Finished with a Multi-Needle Quilted Top Panel of Dura Dac and two layers of Super Soft Quilting Foam.

This Collection is Designed to create a totally new standard in Sleeping Comfort. It will change your thinking of what true Comfort can mean.
